

(a) Carry — concept-localisation overview across multiple anchors

template: what is {a}+{b}? Answer:

what is 205+207? Answer:

$C_{l,m} = \delta_l \cdot \delta_m / (\|\delta_l\| \|\delta_m\|)$ — inter-layer cosine similarity of the delta direction

$D_l = \|\delta_l\|_2$ (raw) and $\tilde{D}_l^{\text{act}}$ (double-normalised) — delta norm across layers vs. permutation null

$\sigma_{l,f} = \cos_{l,f}^{\text{dec}} + \cos_{l,f}^{\text{enc}}$ — combined transcoder feature alignment
